

The Taylor-made Solution for the Industry

Whether plant construction or medical equipment – in all business sectors where devices are handled membrane switches are important operational elements. Processes and materials used in this challenging segment – foil, adhesive, ink – must be smoothly adjusted. Durability, function and appearance, are the most important keywords.

Maqua® Jet DA-RGO is especially developed to print front foils and membrane switches as high end interfaces for industrial machines in a wide variety of applications.

Maqua® Jet DA-RGO enables to decorate the product in a digital printing process without compromising on image quality or durability. It is complementary to the existing media and screen printing ink. Furthermore it does not require changes in the post processing.

Maqua® Jet DA-RGO is the only ink system developed and approved especially for membrane switches and overlays.

Characteristics	Maqua® Jet DA-RGO	Common systems
Image quality	+++	++
Color gamut	++	+
Inkfilm thickness	+++	-
Post processing	++	+
Embossing	+++	+
User friendliness	+++	o

For further information please refer to the Technical Data Sheet on www.marabu-inks.com

Your Benefits:

Taylor-made system

- Developed especially for membrane switches
- Compatible to existing media
- Compatible to existing screen printing inks

Image quality

- Smallest dropsize
- Light colors for smooth pale greys

Simple color matching

- Wide color gamut
- Easy and simple color match process

Odourless and ecologic

- Very userfriendly
- No use of any substance of concern

Available in following colors and containers

- 500cc cartridges
- Cyan, Magenta, Yellow, Black, l.Cyan, l.Magenta, l.Black
- Complementary cleaner: DA-UR Cleaner
